

Your Security & Compliance Roadmap

Manufacturers need security they can trust **without slowing production**. With the InsITe Security & Compliance Roadmap, you get a **practical, defensible security program aligned to how your plant actually operates**.

1 GET A CLEAR PICTURE

Find out where your biggest risks are and what needs attention first.

2 STRENGTHEN YOUR FOUNDATION

Set up the basics that keep your business safe: strong identity, secure networks, protected devices, reliable backups.

3 IDENTIFY YOUR CYBERSECURITY FRAMEWORK

Choose a cybersecurity framework that fits your business needs.

4 DOCUMENT & PRIORITIZE GAPS

Create a clear plan to address gaps based on your framework and risk profile.

5 PUT KEY PROTECTIONS IN PLACE

Turn on and tune the controls that block real threats—and show progress.

6 STAY READY & IMPROVE

Monitor systems, practice response, and keep improving.

Get a Clear Picture of Your Security & Compliance Posture

Before tools, vendors, or frameworks, you need clarity.

This **Cybersecurity Self-Check** helps manufacturers **get a practical snapshot** of where they stand today without complexity or pressure.

What You Will Discover:

Areas of cybersecurity and
privacy risk

Where controls may be
missing or inconsistent

How to create a shared starting
point for next-step planning

Take *the* First Step

Scan the QR code to start your **Security Self-Check**

Who It's For:

- Manufacturers with mixed IT and operational environments
- Teams unsure where to begin or what matters most
- Leaders who want direction before making investments

What Happens Next:

Once you understand your starting point, InsITE can help you:

- Map findings to a practical security roadmap
- Prioritize actions based on identified risk, not trends
- Align security to how your plant actually operates

Practical security for manufacturers that doesn't slow production.
