insITe
BUSINESS SOLUTIONS

Cloud solutions move your data from on-site servers to a secured environment, freeing you up to worry about business, not IT. From world-class security & redundancy to built-in disaster recovery, endless capacity in an instant, and the ability to pay only for what you use, the cloud enables your business.

InsITe is not your typical IT company selling products for short-term fixes. We invest in a long-term cloud strategy for your company's growth.

MIGRATION AND RISK MITIGATION

Making the transition to the cloud requires the careful planning and strategy InsITe can confidently provide. Our Team evaluates costs, risks, and unique needs and only leverages the best cloud service providers who best protect your assets.

Let InsITe evaluate feasibility and build an effective strategy for your business cloud migration.

$ Pay for What You Need

Cloud services shift expenses from upfront hardware and software costs to economical pay-per-use operating fees, often with no long-term commitments.

🔒 Advanced Security

Cloud DBaaS are built with strong threat prevention, robust access control, isolated VM instances, IPSec VPN connections, and encryption at rest and in transit.

✈ Improved Agility

Open doors to faster innovation, improved staff and partner access, and quicker time-to-market; the difference of minutes verses weeks.

Our Top Services

We're **not your typical IT company,** and we mean it. We provide long-term IT solutions tailored for each business.

Cloud Solutions

Tapping the power of world class data centers to optimize uptime, reliability, and cost. Adapt to today's business needs.

Data Security

Keeping up with the continually evolving demands of security to ensure your most important information stays safe.

Business Apps

Providing the applications your business needs to save time, close gaps, and make the work day all that much easier.

Mobile Integration

Ensuring your employees have access to the programs and information they need, regardless of device or platform.

On-site & Hybrid

Working with trusted manufacturers to build, secure, maintain, and connect your on-site server network to the cloud.

System/Apps Management

Support, maintenance and monitoring of your systems and applications putting our Clients ahead of the reaction curve.

Free Assessments

Using Azure? Wanting to migrate to the cloud? We offer cost optimization and migration feasability assessments.

Azure Cost Optimization: We've saved some of our client's **as much as $70,000!**

Office Mobility: We assess mobility and offer a **free test drive** of Microsoft 365

Cloud Migration Feasibility: Let InsITe **evaluate feasibility** and build an **effective strategy**

InsITe Advantage

We employ our **ESIM (Evaluate, Strategize, Integrate, Maximize Results)** process in every project we take on. ESIM is the secret ingredient in all we do, and this mindset makes sure we **understand the problem before we strategize to find the best solution.** It is a structured approach to your needs and allows us to find the very best solutions for your business, long term.
